Special Information about LIFETIME ECONOMY HOMES

The designs in Economy Homes are offered to meet a growing need for permanent housing in which the owner can have the pride of home ownership on THE LOWEST POSSIBLE TERMS.

Homes have been selected for this book that will retain their attractiveness over the years and will not decrease in re-sale value should the owner later desire to secure another home. Due to the steady rise over the years in building cost, houses in this price range help the owner to steadily build up an equity in his home and leads in time to the complete ownership of a valuable piece of property.

While the appearance of the houses and the size of the floor plans will make them acceptable in most residential areas, care has been taken to eliminate or hold to a minimum many of the "frill" items that add to the cost of most custom built homes. In most of the plans in Economy Homes, second Baths, Fireplaces, Planters, closet doors, and expensive millwork have been left out to reduce cost. Kitchen Cabinets while adequate, have been kept to acceptable minimums. Heating in most designs is by gas or oil fired central furnaces but the plans can be heated with electricity in those localities where rates are favorable.

To help the contractor or builder give you the best possible price for the amount of floor space, designs are all held to sizes that will allow the use of 2 x 8 floor joists and 2 x 6 ceiling joists and where desired simple truss rafters. All construction items and sizes specified on our plans can be secured from your local building supply company without additional cost or delay.

To help save your builder time and to enable you to secure the best possible house on the longest terms available from your loan company, we will furnish the house plans just as you plan to build. Plans are available for all houses with Siding or Brick Veneer exterior walls and with Crawl Space, Concrete Slab or Basement Foundations. Our plans will give you a home you can own with pride and they will save the builder many times their cost during construction of your LIFETIME HOME.
